

## CLAIM AMENDMENTS

Please amend the claims by canceling claim 7, amending claims 1, 2, 4, and 5, and adding new claims 8-10, all without prejudice, as indicated on the following listing of all the claims in the present application after this Amendment:

1. (Currently Amended) A computer implemented method of providing user requested music comprising:  
receiving user input defining a plurality of music search ~~parameters~~ attributes, wherein at least one ~~some~~ of the plural music search ~~parameters~~ attributes describe an emotional quality of the music content; and  
searching for music samples based upon the user provided search ~~parameters~~ attributes.
2. (Currently Amended) The method of Claim 1, further comprising:  
presenting music samples to the user based upon the user provided input ~~parameters~~ attributes.
3. (Original) The method of Claim 2, further comprising:  
determining if the user wants to buy any of the presented music samples.
4. (Currently Amended) The method of Claim 3, further comprising:  
determining if the user wants to sample another set of music samples having at least one attribute similar to the music ~~purchased~~ the consumer wants to buy.
5. (Currently Amended) The method of Claim 3, further comprising:  
determining if the user wants another set of music samples ~~that is~~ having at least one attribute different than the ~~purchased~~ music the consumer wants to buy.
6. (Original) A computer system for providing user requested music comprising:  
an input module for receiving user defined parameters for searching music; and  
a searching module for searching music based upon the user defined parameters.

7. (Canceled) Please cancel claim 7 without prejudice.

8. (New) A computer implemented method of providing user requested music comprising:

receiving user input defining a plurality of music search parameters including at least one attribute, wherein at least one attribute involves a situational quality of the user requested music; and

searching for music samples based upon the user provided search parameters.

9. (New) A computer implemented method of providing user requested music comprising:

receiving user input defining a plurality of music search parameters including at least one attribute, wherein at least one attribute involves a sound quality vector of the user requested music; and

searching for music samples based upon the user provided search parameters.

10. (New) A computer implemented method of providing user requested music comprising:

receiving user input defining a plurality of music search parameters including at least one feature vector, wherein at least one feature vector describes music content other than the genre of the music; and

searching for music samples based upon the user provided search parameters.

11. (New) A computer implemented method of providing user requested music comprising:

receiving user input defining a plurality of musical content attributes, wherein at least one attribute describes the mood of the music; and

searching for music samples based upon the user provided search attributes.
